

# CONSCIOUSNESS RESEARCH INSTITUTE

## About Consciousness Research Institute

Consciousness Research Institute, LLC was founded by metaphysicist Aerez Batat in 2019. The organization is dedicated to the advancement of human potential through the research, development and education of consciousness-related sciences. CRI's mission, simply put, is to understand the human mind.

Consciousness Research Institute operates as a research center, a publishing agency and an online School of Practical Metaphysics. The institute is heavily focused on researching Hebrew Metaphysics, a 4,500-year-old body of knowledge that contains a map of the human psyche. This vast body of knowledge is mainly in Hebrew and Aramaic. It includes a blueprint of the conscious and self-conscious human mind, as well as the mechanism behind human emotions, sexuality and other aspects of our subconscious mind.

CRI Operates The School of Practical Metaphysics, an online community of people who are interested in maximizing their human potential by learning how the mind works. The purpose of the school is to serve as a platform for learning, teaching and information exchange. The school is hosted via Patreon.

Consciousness Research Institute, LLC is located in Spokane, WA.
